Gentlemen: To Dell

The late Eugene F. Dowse of La Grange Park, Illinois very early in the game developed a theory regarding the death of John F. Kennedy, which fits all the data that has come to light since. This includes President Johnson's passive attitude toward the situation as per the last page of Harold Weisberg's Whitewash II, see enclosure.

Sincerely

Raymond J. Hamod

Enclosure: Photostat of p 384

other Department of Justice officials [illegible] incompetence of the FBI to explain these [illegible] discrepancies?

Least dignified of all is the performance of the President in answer to a press conference question on November 3. He made pointed reference to the fact that the late, beloved President's brother was Attorney General during the period the Warren Commission was "studying this thing", in a context that blamed any shortcomings or error on the former attorney general; said "I *know of*" no evidence casting doubt on the Report; and said that if any turned up the non-existent Commission "will take action".

All of this came immediately before the third anniversary of the assassination. It made a shameful official commemoration.
